

ADITYA J

Bangalore, India | [+91-7259457638](tel:+91-7259457638) | adityagond1035@gmail.com | github.com/Adii0906 | linkedin.com/in/aditya-i-458824313 | adiii-dev.vercel.app

OBJECTIVE

Fast learner who loves building AI applications and shipping things quickly. I pick up new frameworks in days, not weeks, and care about writing clean code that works in production. Looking for an internship where I can contribute from day one, build real things, and grow alongside a team that moves fast.

EDUCATION

CMRIT, Bangalore 2025 – 2027

B.Tech — Artificial Intelligence & Data Science

Hindustan Electronic Academy Polytechnic, Bangalore 2023 – 2025

Diploma — Computer Science Engineering | CGPA: 9.0 / 10.0

TECHNICAL SKILLS

Languages: Python, JavaScript, Java, C, HTML, CSS

AI / ML: LangChain, LangGraph, LangSmith, RAG Pipelines, LLM APIs, Groq, Ollama, Scikit-Learn, Pandas, NumPy

Backend & UI: FastAPI, Flask, Streamlit

Databases: MySQL, MongoDB

DevOps & Tools: Git, Docker, Google Cloud Platform, Jupyter Notebook, VS Code

PROJECTS

Data Analysis Agent github.com/Adii0906/data-analysis-agent

Stack: Python · LangGraph · Streamlit · Groq

- Upload a file and describe how to handle missing data — the AI orchestrator plans every step and coordinates multiple tools to clean, calculate, and visualize the dataset automatically.
- Generates a professional written summary and a downloadable interactive HTML report, handling multi-source data including CSVs, GitHub metrics, and web traffic exports.
- Built with a modular LangGraph pipeline where each node handles a distinct analysis task, making it easy to extend with new tools or data sources.

ContextGen-AI — RAG Document Q&A Bot github.com/Adii0906/ContextGen-AI

Stack: Python · LangGraph · Groq · FAISS · Streamlit

- Upload any PDF or TXT document and ask questions grounded entirely in its content — powered by a local RAG pipeline (split → embed → retrieve → generate) with no external API keys required.
- FAISS vector indexing enables fast semantic search across large documents; answers are sourced strictly from the uploaded content, eliminating hallucinations.
- Includes a general AI mode to switch between document-grounded answers and open-ended queries, all within the same clean Streamlit interface.

Local Agent CLI — Offline Terminal AI Agent github.com/Adii0906/Local-Agent-CLI

Stack: Python · LangGraph · Ollama · Rich

- Fully offline terminal AI agent powered by Ollama for general-purpose chat, code analysis, and file operations — zero internet dependency with user-controlled file permissions for safety.
- Modular plug-and-play architecture with Rich-powered syntax-highlighted output; supports hot-swappable local models (Mistral, LLaMA 3, Gemma) via a single config flag.
- Designed as a lightweight prototype to explore how local LLMs can assist with multi-step reasoning, code review, and basic automation entirely on-device.

EXTRACURRICULAR & COMMUNITY

Hacktoberfest 2025 — Super Contributor | Resolved 6 OSS issues across Python & AI public repositories

1st Prize — Hacktoberfest Hackathon | Built an open-source AI project; selected among all competing teams

Open Source Mentor | Guided first-time contributors through issue triage, PR reviews & onboarding
